Personal Statement of Goals

The doctor of education curriculum requires the prospective student to be employed in an education or training setting related to one of the concentrations offered. One intended outcome of the doctoral program is improvement in the student's professional development in the field of education or training and in the concentration; another is advancement of the educational program in the student's institution or organization as a result of applied research projects accomplished by the student as required for graduation.

Explain how you think the doctoral program will enhance your professional development. What goals have you set for yourself in connection with the program? How do you think your enrollment will benefit your institution or organization? Share your thoughts about prospective applied research projects (practicums, MARP) you might undertake that will improve education or training activities in your organization. (Attach a separate sheet if necessary and include your Social Security number.)
